Professional Experience

- 08/2021 ~ 04/2022 Full Stack Developer - (contract)

Company: **Seidat**

Location: **Helsinki, Finland**

Website: **<https://seidat.com>**

As a full-stack developer, I worked on an Nx monorepo architecture project with React.js and Meteor.js.

- Implemented several new features like team-selected default tags, transparency, live-share mode, presentation-meeting-note, and so on.
- Migrated JavaScript libraries to TypeScript.
- Updated to the latest Stripe API version.
- Cooperated in integrating several third-party services like Pipedrive.
- Reviewed strictly the other developers' PRs to improve their abilities.
- Cooperated with the sales team to build a user-friendly website.

Skills:

React, Redux, Nodejs, MongoDB, Meteor, GitHub, CI/CD, JEST, TypeScript, JavaScript, Python, AWS, Jira, Slack

Reference Letter

To whom it may concern,

Jin Wen worked with us at Seidat as a Full Stack Developer from August 2021 till April 2022 and reported to me in my position as Head of Software Development.

As an employee, Jin proved to be a capable software engineer and demonstrated great knowledge of JavaScript and TypeScript working with a progressive web app written in Node and React. He solely delivered multiple mission-critical features on both the client and server side. He possesses up-to-date skills required to build web applications from the ground up, as well as to set up the development environment. Jin is curious, always willing to learn new things and contribute outside of his scope of work. Perfectly manages scenarios where he needs to perform under pressure.

Without any hesitation, I'd like to recommend him for a similar position. Should you have any further questions, feel free to reach me at artem@seidat.com.

Best,
Artem Kondratev

15th of April 2022, Helsinki

• **05/2021 ~ 04/2022** **Full Stack Developer - (part time)**

Company: **ARAZAS**

Location: **Vancouver, Canada**

Website: **<http://www.arazas.com>** (not yet published)

Serving as a core developer, and technical manager. Contributed to several websites like dreamify-v1, dreamify-v2, dreamify-v3, and so on.

- Fixed several issues on dreamify-v1.
- Built dreamify-v2.0(test version) from scratch.
- Modified dreamify-v2.1 (test version) UI for mobile responsibility, built a user-friendly website and added some new features.
- Built dreamify-v3 from scratch. This was the final product.
- Designed the Cloud Architecture of the company by AWS.
- Cooperated with the product manager to build a user-friendly website.
- Reviewed strictly the other engineers' PRs as a technical manager.

Skills:
