vyacheslavbordev@gmail.com

I'm a full stack developer who has experience of 7 years and handled many projects for businesses from startup to large scale.

Working as a full stack developer for several years made me to have multiple skills in programming sphere.

About my skills and experience, I have several years of experience in Blockchain development and 7 years in Fullstack Web development.

My experience enables me to make business success of clients. I understand that every project that represents a business plays a very important role in its growth.

## -Blockchain Development

- " Crypto Coins Exchange Development
- " ICO Development with Created Token ( Coin )
- " Smart-Contracts (Solidity, Truffle framework)
- " Build POW, POS , MN and Stable coins
- " Develop Stable coins ( USDT, TrueUSD, USDX etc.)
- " Token development (ERC20, ERC223, ERC721, ERC 1155)
- " NFT (Non Fungible Token) Marketplace
- " Cryptocurrency Wallet Development for Linux, windows, Mac, Web.
- " Ethereum based Dapps development
- " Web3

## -Web Development

- "Backend: PHP/(Laravel, CI), Node.js/Express, Python/Django, C#/.NET
- "Frontend: React.js, Vue.js, Angular, Html5, Javascript, Typescript, Bootstrap, CSS, SASS, Tailwind CSS

## -Other

- " golang
- " DevOps
- " AWS
- " WebRTC
- " C/C++/Java
- " Project Management with Jira, Trello, Asana
- " Database Optimization(Mysql, MongoDB, Postgresql, Oracle)

Some cool facts about me is that I can work full time for your project and

I can deliver 100% result. I will do my best for you and your business success. Thanks for visiting my profile.

## Work Experience

### Raplex Development

**Description:** Raplex is a cryptocurrency wallet which can send, receive, exchange, deposit, withdraw, buy, sell cryptos.

**Backend:** Laravel, PHP

**Frontend:** React.js, SCSS, Typescript

**Database:** Postgresql

#### 3rd Party Integrations:

- Crypto wallet management using Cryptoapis.io
- Integrated Payment Gateways, PayPal & Stripe, to process 20k+ daily payments

#### Server Side Development

- Managed 5+ cloud based server s master/slave design daily via Amazon EC2 and nginx
- Conducted load balancing using AWS Load Balancer and nginx to handle a constantly increasing user base
- Played a crucial role in Caching server/logic setup using Redis; led to 99% customer satisfaction

#### Data Security & APIS

- Developed API and mobile app with react native for 100% GUI
- Implemented OAuth2 based authorization to ensure user 100% data security

### Ugly Coin Development

**Description:** Create Ugly Token based on Binance Smart Chain and build Dapp and website for ugly coin.

**Technology:** Solidity, Web3.js, Truffle, Reactjs

#### Blockchain Works.

- NFT Based Marketplace which works on Ethereum Network.
- Smart Contract with solidity
- Dapp development with React.js and Web3
- Tokens(ERC20, ERC223, ERC721, ERC 1155, BEP20)

## Freelancing Website Development

**Description:** Freelancing website development like Upwork with live chat

**Backend:** Django

**Frontend:** Reactjs, Tailwind Css

**Database:** Postgresql

**Intergration:**

- Socket, Pusher for live chat
- Paypal and Stripe intergration

## WEB1 Development

WEB1 is a service app for real time chat, sms, call which was built with Node.js and WebRTC for backend.

Performed integration with Twilio api for real time chat, sms, call.

## Skills

Blockchain, Ethereum, Binance Smart Chain, Tron - 3 years

Solidity, Web3.js, Truffle - 3 years

Javascript, Php, Html, CSS - 7 years

Typescript, ReactJs, NodeJs - 5 years

Laravel - 5 years

VueJs - 4 years

C++, Java, Python - 5 years

Reverse C - 2 years

Go, DevOps - 2 years

AWS - 2 years

## Education

**Moscow Institute of Physics and Technology, Russian Federation**

Bachelor's

Faculty of Applied Mathematics, Mechanics and Computer Science

2010 to 2014
