## SUMMARY

I'm a passionate Front-end and full stack developer with 7 years of experience in the software industry. An accomplished individual with a strong background in JavaScript, HTML, and CSS. And significant experience developing complex production user interfaces for websites and web applications with modern front-end tooling such as React (React-Hooks and React-Context), Next.js, Typescript, Redux, Material UI and Styled Component. Have a good understand of programming, can come up with plenty of innovative ideas and possesses superb communication skills. I have professional experience in building architecture and designing the best database system back-end APIs for back-end projects. Recently, I'm very interested in blockchain. I've been working with Blockchain technologies for the past few years and have experience with launching Blockchain projects having secure and scalable Ethereum smart contracts at its core.
