

Leon Adams

Full Stack Engineer

Address : Radosna 41, Białystok, Poland

Gmail : la.midas1124@gmail.com

Summary

Detail-oriented and self-driven **Full Stack Engineer** with a proven history in developing and building web-based solutions, maintaining and updating software products. Focus on creating collaborative efforts, cracking cutting-edge technologies, high quality, and efficiency leading teams of developers.

My Skills

- | | |
|---------------|----------------|
| • JS/TS | • ExpressJS |
| • Python | • NestJS |
| • C++/C# | • Fastify |
| • jQuery | • Web3.js |
| • React/Next | • Solidity |
| • Vue/Nuxt | • Django/Flask |
| • Angular | • REST API |
| • TailwindCSS | • FastAPI |
| • MaterialUI | • Git/Github |
| • Bootstrap | • AWS |
| • ChakraUI | • Azure |
| • SQL | • Google cloud |
| • Postgres | • Docker |
| • MongoDB | • Kubernetes |
| • GraphQL | • CI/CD |
| • NodeJS | • Jira/Scrum |

My Typical Projects

- Nuxt.js/Node.js
<https://www.harnicuta.ro/>
- Next.js/Node.js
<https://mystarproduction.ro/>

Education

University of Pannonia / Faculty of Information Technology

- 2008 - 2012
BSC (Bachelor of Computer Science)
- MSC course, 2012 – 2014
MSC (Master of Computer Science)

Professional Experiences

Full Stack Engineer, Work on Contract | Jun 2019 - Present

- Built multiple web apps using combinations of React, React Native, Next.js, the MERN stack, and several different APIs.
- Developed and led the development of a fleet of new microservices to solve business problems around transactions, funding, fees, promotions, and many other domains.
- Developed a secure REST API using NestJS and deployed it to Google Cloud Platform.
- Implemented a new version of checkout supporting recurring subscriptions using microservices built in Node.js and TypeScript.
- Built a simple DApp using Web3.js on the Ethereum network. The DApp interacts with a smart contract and has a React frontend.
- Implemented an OAuth mechanism so users can login securely using their preferred social network profile.

Full Stack Lead Developer, BLITZBRAIN | Nov 2017 – Apr 2019

- Translated requirements and UX designs into functional frontend code accurately utilizing React and MUI.
- Produced clean, well-documented, maintainable, testable, and scalable code base on Github's functionalities – PR, revert as well.
- Built a complete, full-stack web application for a fintech startup using Next.js, Prisma ORM, a PostgreSQL database, and TailwindCSS.
- Built from scratch admin platform for managing platform's database entities and users using React, Node.js, and Mongoose.

Full Stack Developer, ONE BEYOND | Dec 2014 – Oct 2016

- Built an internal tool for risk management as a rich single-page application SPA using Angular.
- Developed the back-end using Express.js, Redis, and MongoDB.
- Built middleware/API gateways that handled external APIs.
- Designed and developed the company's website using a custom made CMS.
