

ADRIAN AHMAD

Full Stack Developer

As a highly skilled Full Stack Engineer, I have a strong background in the planning, implementation, testing, and maintenance of decentralized applications and systems. I am well-versed in a range of blockchain technologies, including Ethereum, Solana, Web3, and Truffle, and have experience with a variety of decentralized applications and NFT marketplaces. In addition to my expertise in blockchain, I am a versatile software developer with a tech stack that includes a range of programming languages and frameworks such as React.js, Angular, Node.js, Python, MySQL, and Solidity. I am proficient in cloud platforms like Azure, Firebase, and AWS, and have experience with CI/CD tools like Jenkins, Git, and Docker. Throughout my career, I have worked on a variety of software development projects using different team structures and procedures, and have a proven track record of success. I am a highly adaptable and flexible developer, with strong problem-solving skills and the ability to work effectively in a range of environments. I am confident that my skills and experience make me an asset to any team looking to build or improve their software products, particularly those in the blockchain space.
