OBJECTIVE

I am a Software Engineer adept in building highly functional Rest services, web apps and desktop apps using python and javascript and writing smart contracts with solidity. I always look to contribute extensively to any project i am involved in, technically and in other aspects, learn as much as i can and become a valuable asset to the team. i love taking on tasks that require extensive research and i do it well.

WORK EXPERIENCE

Gotahia Stores   (September 2020 - Present)
Software Engineer

- Wrote highly maintainable, solid code for the backend api.
- Wrote comprehensive unit-tests for all features delivered
- Provided proper documentation for all endpoints delivered.
- Brainstorm to solve complex problems and and write efficient code to solve, a typical example was building a solution for our complex pricing strategy, which resulted in plaudits from my team lead and members for my implementation.
- Made use of tools and services such as amazon s3, cloudinary, redis etc.

LinuxJobber   (January 2020 - March 2020)
Full Stack developer Intern

- Developed full stack scrum application for managers to manage projects with Django and Angularjs.
- Made use of amazon s3 bucket and ec2 instance for deployment services.

Hotels Ng Internships   (June 2020 - August 2020)
Python Developer Intern

- Collaborated with teams to deliver highly functional microservices on time.
- Made use of tools and services such as docker for containerizing our apps, cloudinary for serving assets and amazon ses for our email api.
- Among the Top Hundred Finalists out of over 8 thousand Interns that started the Internship.

Minority Programmers   (July 2021 - Present)
Blockchain Developer

- Implemented, tested and audited smart contracts for the inctive based learning tokens.
- Designed, Implemented and tested the Governance token smart contract to be used in community voting.
- Hooked up smart contract to Front end pages using react, next and ethers.js

SKILLS

Python   **React**
Very Good

Django   **javascript**
Proficient

Solidity   **REST APIs**
Proficient   Proficient

AWS   **Postgresql**
Familiar   Proficient

Flask   **Docker**
Proficient   Familiar

web3   **Swagger Documentation**
Proficient   Proficient

Github Actions
Proficient

ACCOMPLISHMENTS

Hackathon NFT Certificate
Idle Finance and Defi Summer

Won a Hackathon sponsored by **Idle.finance**: **Certificate**

LinkedIn Assessment
LinkedIn

Passed the LinkedIn assessment test for Python, **Profile**

Blockchain basics
University of Buffalo

completed Blockchain Course on Cousera, **Certificate**

Data Science Foundation
IBM

completed the data science foundation course and test with **IBM**

Data Manipulation with Pandas
DataCamp

completed the Data Manipulation **course and project**

EDUCATION

University of Ilorin   (August 2014 - September 2019)
Bachelor's Degree Botany

PROJECTS

Email microservice
https://email-microdev.herokuapp.com/

Built a mailing microservice for sending of email, using services such as smtp and amazon ses. with the django rest framework. github link: https://github.com/Prometheo/email-microapi

Movie rating API
https://bento-movies.herokuapp.com

Built an API to rate and add movies to personal collections.

Remote camera player(Desktop App)
https://github.com/Prometheo/project-nigeria

Built a remote cam player, for playing cctv videos. made use of the pyqt6 gui library and python vlc wrapper

currency converter
https://convert-my-currency.netlify.app/

i built a currency converter app using django and angular as front end, my app gets the latest exchange rates for about 166 different currencies. django git link: https://github.com/Prometheo/finance-microapi angular git link: https://github.com/Prometheo/financial-app

HOBBIES

Gaming

Football(Playing and Watching)

history and biographies.

Blockchain Enthusiast

LANGUAGES

English   **Spanish**
Fluent   conversational
